10.11 Stainless Steel characteristics

| AISI Standard | 301 | 302 | 303 | 304 | 304 Cu |
|--|---|--|--|---|--|
| German Material No. | 1.4310 | 1.4325 | 1.4305 | 1.4301 | 1.4567 |
| DIN / EN-Number | EN 10088-3 | EN 10088-1 | EN 10088-3 | EN 10088-3 | EN 10088-3 |
| Symbol | X 10 CrNi 18-8 | X9CrNi 18-9 | X 8 CrNiS 18-9 | X 5 CrNi 18-10 | X 3 CrNiCu 18-9-4 |
| Alloying components % | $C \le 0.05 \dots 0.15$ $Mo \le 0.8$ $Cr 16.0 \dots 19.0$ $Ni 6.0 \dots 9.5$ | $C \le 0.08$ $Si \le 0.6$ $Mn \le 1.2$ Cr 18.0 Ni 9.0 | $C \le 0.10$ $S \le 0.15 \dots 0.35$ $Cr 17.0 \dots 19.0$ $Ni 8.0 \dots 10.0$ | C ≤ 0.07 Cr 17.5 19.5 Ni 8.0 10.5 | C ≤ 0.04 Cr 17.0 19.0 Ni 8.5 10.5 Cu 3.0 4.0 |
| Minimum tensile strength Rm in N/mm ² | 500 750 | 600 800 | 500 700 | 500 700 | 450 650 |
| Yield strength Rp 0.2 in N/mm ² | ≥195 | ≥210 | ≥ 190 | ≥190 | ≥175 |
| Machinability | poor | good | very good | medium | medium good |
| Forgeability | good | poor | poor | good | good |
| Weldability | excellent | poor | poor | excellent | good |
| Special characteristics | antimagnetic, austenitic structure usable as spring steel up to 300°C | Non-magnetic structure. Suitable for low temperatures | antimagnetic, austenitic structure | antimagnetic, austenitic structure suitable for low temperatures, can be used up to 700 °C | antimagnetic, austenitic structure suitable for cold forming |
| Corrosion resistance | good however, sensitive to intercrystalline corrosion | fair | medium due to the sulphur content reservations in environments which contain acids and chlorides | good resistant to corrosion, in the natural environment: water, rural and urban atmospheres without significant chloride or acid concentrations, in food areas and in agricultural food areas | good resistant to corrosion in the natural environment: water, rural and urban atmospheres without significant acid concentrations, in food areas and in agricultural food areas |
| Main areas of application | Springs for temperatures up to 300 °C, Tools (knives), Plates for vehicle construction, Chemical and food industry | Used for the manufacture of springs in various fields of application | Vehicle construction, Electronics, Decorative purposes (Kitchen equipment), Machine const- constituction | Food industry, Agriculture, Chemical industry, Vehicle construction, Construction industry, Machine construc- tionstruction, Decorative purposes (Kitchen equipment) | Food industry, Agriculture, Chemical industry, Machine construction, Shipbuilding, Electronics, Screw industry |

The characteristics described should be treated as guidelines only. No guarantee is made. The exact conditions of use have to be taken into account individually.

Material characteristics of Stainless Steel continued

| AISI Standard | 316 | 316 Precision casting | 316 Precision casting | 316L (bar steel) | 316 LHC Sintered Material |
|--|--|--|--|--|--|
| German Material No. | 1.4401 (A4) | 1.4405 | 1.4408 | 1.4404 | 1.4404 |
| DIN / EN-Number | EN 10088-3 | EN 10213-4 | EN 10213-4 | EN 10088-3 | Sint C40 |
| Symbol | X 5 CrNiMo 17-12-2 | GX 4CrNiMo16-5-1 | GX 5 CrNiMo 19-11-2 | X 2 CrNiMo 17-12-2 | X 2 CrNiMo 17-13-2 |
| Alloying components % | C ≤ 0.07 Cr 16.5 18.5 Ni 10.0 13.0 Mo 2.0 2.5 | C ≤ 0.06 Cr 15.0 17.0 Ni 4.0 6.0 | C ≤ 0.07 Cr 18.0 20.0 Ni 9.0 12.0 Mo 2.0 2.5 | C ≤ 0.03 Cr 16.5 18.5 Ni 10.5 13.0 Mo 2.0 2.5 | C ≤ 0.08 Mo 2.0 4.0 Cr 16.0 19.0 Ni 10.0 14.0 |
| Minimum tensile strength Rm in N/mm ² | 500 700 | 760 | 440 650 | 500 700 | 330 |
| Yield strength Rp 0.2 in N/mm ² | ≥ 200 | ≥540 | ≥ 185 | ≥ 200 | ≥ 250 |
| Machinability | medium | poor medium | medium | medium | - |
| Forgeability | good | _ | _ | good | _ |
| Weldability | good | good | good | excellent | - |
| Special characteristics | antimagnetic, austenitic structure suitable for low temperatures, can be used up to 600 °C | antimagnetic, martensitic structure | antimagnetic, austenitic structure | antimagnetic, austenitic structure suitable for low temperatures, can be used up to 700 °C | antimagnetic structure |
| Corrosion resistance | very good significantly higher than AISI 304 in natural environmental mediums and moderate chlorine and salt concentrations, however not resistant to ocean water | resistant to corrosion, reservations apply particularly in the case of environments with exposure to acid and salt | very good acid-resistant | very good significantly higher than AISI 304 in natural environmental mediums and moderate chlorine and salt concentrations, however not resistant to ocean water | medium by virtue of its coarser porosity the corrosion resistance is in general reduced as compared with stainless steel, reservations especially in acid and salty environment |
| Main areas of application | Chemical industry, Food industry, Machine construction, Building industry | Pumps, Valves, Parts for hydropower engineering | Chemical industry, Food industry, Fittings, Pumps, Machine construction | Vehicle construction, Chemical industry, Food industry, Medical / Pharmaceutical industry, Building industry | Paint, oil, soap and textile industry, Electronics, Decorative purposes (Kitchen equipment) |

The characteristics described should be treated as guidelines only. No guarantee is made. The exact conditions of use have to be taken into account individually.

Material characteristics of Stainless Steel continued

| AISI Standard | 316Ti | 431 | 440C | 630 | CF-8 Precison casting |
|--|--|--|---|--|--|
| German Material No. | 1.4571 | 1.4057 | 1.4125 | 1.4542 | 1.4308 |
