

25 March 2020

As you are aware, the COVID-19 outbreak is affecting everyone globally. Oceania Industrial Components (OIC) is continuing to trade, however we are closely monitoring developments and their impact on our customers and staff.

OIC understands that everyone's safety is paramount, and as we trade, we will continue to strictly comply with the Australian Governments guidelines and regulations, thus ensuring we do our part to contain the spread of contagion.

Given the current circumstances, we will continue to operate as normal via email and telephone and shipment of products. However, OIC strongly discourage customers from visiting our premises until social distancing measures are lifted.

OIC continues to receive product from its key suppliers in Italy and Germany, however our Italian supplier, Eles S.p.A, will be closed from Wednesday 25 March through to 3 April, in accordance with their Government mandate. Production and dispatch from Italy will resume as normal on 4 April. Our German supplier, Otto Ganter GmbH, continues to supply product as normal.

OIC will continue to monitor and send updates with any significant changes as necessary.

OIC look forward to continuing to assist our customers during these extraordinary times. Should you have any questions, please do not hesitate to contact a member of our team on 1300 506 505.

Thank you for your support and understanding.

Yours faithfully,

Allan Harness  
Managing Director
